Professional Summary

Final-year Game Design student at An-Najah National University specialising in systems design and level design for interactive games. Experienced in developing multiple academic and personal game projects using Unity (C#) and Unreal Engine 5 (Blueprints). Strong understanding of gameplay mechanics, player experience, and level flow design. Passionate about creating engaging and polished game experiences through creative problem-solving and teamwork. Seeking a junior game design or level design internship to contribute skills and grow within a professional studio environment.

TECHNICAL SKILLS

Engines	Unity (C#, 4 Years). UnrealEngine 5 (Blueprints, 3 Years).
Design Tools	Figma . AfterEffect(Basic) . Premiere Pro . GDD
	documentation
	Adobe XD
Art & Audio	Photoshop . Illustrator . Audition . ZBrush . Maya .
	Blender(Basic) . Character Creator
Code	C# . C++ (Basic) . Python (PYGame). Blueprints
Other	Trello . Google Workspace . Github

GAME PROJECTS

DELIVERY FRENZY > *Lead Designer / Lead Developer*.Unity.PC
[University Project / Sept 2025].

- Developed a multiplayer delivery game using **Unity** and **Photon PUN**.
- Designed cooperative gameplay with two roles: **Driver** and **Courier**.
- Implemented package pickup/delivery systems with scoring and timer mechanics.
- Created UI for score, packages, and remaining time using **TextMeshPro**.
- Added mini map and navigation indicator to improve player experience.

EXPERIENCE

Freelance Game Developer – *Unity Project Developer / Aug - 2024*

- Developed a digital prototype of a board game using Unity for a private client .
- Transformed the concept into an interactive playable version later used for physical printing.
- Worked directly with the client to refine gameplay mechanics and design details

IGDA Student Chapter Volunteer – *An-Najah National University*

- Participated in activities and events organized by the IGDA university branch.
- Supported community engagement in game development and design initiatives.
- Collaborated with students and professionals through workshops and networking events.

Design Software Instructor – *Workshop / Training Experience* – 2023

- Delivered training sessions on design software such as Adobe Premiere Pro.
- Guided beginners in video editing fundamentals and creative workflows.
- Prepared educational content and hands-on practical exercises.

EDUCATION

Bachelor's Degree in Game Design and Development – *Graduation: Jun-2026* .

- Specialized in game systems design, level design, and interactive media.
- Studied game development using **Unity, C#, Unreal Engine 5**, and digital design tools.
- Completed academic projects in game programming, multiplayer systems, UI/UX, and gameplay mechanics.

AWARDS

- Developed and delivered a multiplayer game project using **Unity and Photon PUN** as part of academic coursework.
- Completed and shipped more than **6 game projects** through academic and personal work.
- Converted a digital board game prototype built in Unity into a **physically printed version** for a client.
